

FOUR SEASONS HOTEL
Toronto

September 23rd, 2015

We installed Ruks OdoTron Odor Control System for removal of odor from the exhaust air of kitchen hoods for our Main Kitchen and Bar / Pantry Kitchen at Four Seasons Hotel, Toronto. The Main Kitchen operates 24/7. Ruks OdoTron System is in continuous operation since Jan 2015. Since the installation of Ruks OdoTron System, we have removed the carbon filters. Removal of carbon filters has reduced power consumed by exhaust air fan in improved the air flow of the exhaust system.

I am pleased to say the OdoTron System has tremendously minimized the odors from Kitchen Exhaust Air. We have not replaced carbon filter since the installation of OdoTron. The system is in operation to our satisfaction.
